INTRODUCTION

About this manual

This manual contains complete user instructions for the Spirit. It gives you the necessary instructions to safely install, operate, do maintenance and do troubleshooting on the device.

Original language

The original language of this instruction is English.

Printing options

This manual is made to be printed as a double sided A4 or A5 booklet.

Limited warranty

Refer to www.bluewatergroup.com for more information on Limited warranty.

Environment information

80% of the the water purifier components and its packaging have a label to help you recycle and discard it correctly. The water purifier is more efficient when it cleans water for longer periods. Example: do not fill a glass with water. Fill a jug instead.

Disposal

At the end of the water purifier's life, disconnect the plug from the electrical supply and cut the cable at the point where it enters the appliance. Make sure that children do not play with the left-over cable. Contact your local authority for information about where the water purifier can be left, or contact your dealer.

Appliances bearing this symbol must be deposited at the designated local reception point for the disposal of electrical and electronic equipment. This product may not be disposed of using the normal household refuse collection processes.

Safety instructions

Before you install or operate the device, you must read the safety information. Obey the instructions in this manual to prevent injuries or damage to the equipment. This manual contains CAUTIONS and NOTES that are applicable for the safe operation of the device.

A CAUTION identifies conditions that can cause injury or, damage to the equipment. Obey the instructions and do not continue until all conditions are accepted and engaged.

A Note identifies important information for a trouble free and optimal use of the water purifier.

Safety information

Install the water purifier in accordance with local regulations. If you are not sure, contact a Bluewater dealer for aid. Bluewater has no responsibility for installation of the water purifier.

Do not drink the water when the service light shows that it is not clean. Store water in vessels that are resistant to corrosion.

This appliance can be used by children who are more than 8 years old. It can also be used by persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge, if they have been given supervision or instruction about the use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.

Do not repair or modify parts of the water purifier. This can make it operate incorrectly, and lead to injury and damage not covered by the warranty.

Spirit is a reverse osmosis system. It contains a replaceable membrane that is very important for effective reduction of total dissolved solids (TDS). Replace this membrane regularly. Test the cleaned water periodically, at least one time every year, to make sure that Spirit performs correctly.

Only approved Bluewater staff can do servicing and repairs on the water purifier. Only use original replacement cartridges and parts from Bluewater. For the spare parts catalogue and contact information for purchases, see www.bluewatergroup.com.

The water to be cleaned must obey the requirements in "Technical information". Test the water at least one time every year. If the water is not clean, do not drink it. Contact a Bluewater dealer.

Installation must comply with applicable local plumbing codes and regulations.

Only connect the water purifier to one clean water faucet supplied by Bluewater. Do not connect it to other pipes, tanks or dishwashers.

Do not put or keep objects on top of the water purifier. Do not put the water purifier in water.

Connect the water purifier to an earthed electrical supply. Use a socket that is easy to access after installation. Only an approved electrician must do permanent wiring on the system. A safety switch must be installed on the system. Incorrect installation can lead to damage, or make the water purifier dangerous to use.

Do not use the power cord if there are visible signs of damage on it. If the power cord is damaged, a qualified electrician must replace it in order to prevent danger.

If the water purifier is disconnected from water and electricity for >5 days, store it as described in "Put into storage" on page 20.

PRODUCT OVERVIEW

| | | | |
|-------|--------------|-----------------------------------------------------------|-----------------------------------|
| Model | Spirit 300 | Electronically controlled | Bluewater faucet |
| | Spirit 300Cp | Pressure controlled, compatible with household appliances | Faucet adapted to reverse osmosis |

Spirit outside

Figure 1. Spirit outside

Data plate

The data plate is located behind the filter.

Figure 4. Data plate

Move the water purifier

Always transport the water purifier upright.
Install according to "Installation" on page 09.

Put the water purifier into storage if it will not be used for 4 months or more, or if it is to be disconnected from the water and electricity for >5 days, see "Put into storage" on page 20.

Figure 5. Move the water purifier

SYSTEM OVERVIEW

System description

Figure 6. System overview, example of a Spirit installation

| Pos | Description | Pos | Description |
|-----|---------------------------------------------|-----|------------------------------------------------------|
| 1 | Water purifier | 6 | Bluewater faucet |
| 2 | Power cord | 7 | Faucet adapted to reverse osmosis |
| 3 | Feed water hose | 8 | Clean water hose |
| 4 | Drain water hose, installed with an air gap | 9 | Faucet electrical connection (Spirit 300) |
| 5 | Bracket for drain water hose | 10 | Pressure tank, household appliance, e.g. dishwasher. |

Intended use

The water purifier is intended to produce purified water. Do not use it for any other purpose. Any use beside indoor home environment and for purposes other than purifying water for household use is considered as unintended use and will automatically void your warranty.

The electronically controlled Spirit 300 is intended to produce the quantity of water that is normally required for cooking and drinking in a household. The pressure controlled Spirit 300Cp can be connected to other devices such as dishwashers.

Water production

Figure 7. Water production on/off

Automatic flush

An automatic flush will be performed if one of the conditions below are fulfilled:

Figure 8. Automatic flushing

| Pos | Description |
|-----|------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Flush after drawing water. Production cycles shorter than 60 seconds are added together, and flush takes place when total drawing time exceeds 60 seconds. |
| 2 | Flush after maximum operation time 15 minutes. Next production cycle can be started immediately after completed flush. |
| 3 | Water purifier in standby mode. Spirit is connected to water and power and It is more than 6 hours since the last flush. |

Leak protection system

A sensor at the bottom of the water purifier senses water leaks. If there is a leak, the feed water supply is stopped. The water purifier cannot be started again until the leak has been repaired.

INSTALLATION

Install the water purifier in accordance with local regulations. If you are not sure, contact a Bluewater dealer for aid. Bluewater has no responsibility for installation of the water purifier.

Installation must comply with applicable local plumbing codes and regulations.

Install the water purifier in a vertical position on a horizontal surface. Make sure that hose and cables can move freely when the purifier is moved.

Only connect the water purifier (only Spirit 300) to one clean water faucet supplied by Bluewater. Do not connect it to other pipes, tanks or dishwashers.

Only connect to the cold water supply, and a water of known quality that fulfills the requirements on feed water

Plumbing must be done by an approved plumber. Obey local rules for plumbing and sanitation if you do work yourself.

Use the hose set that is supplied with the water purifier. Do not use used hose sets again.

Before installation

Unpack Spirit

Warning! Discard the packing material. It can cause injury to children if they play with it.

Make sure that Spirit shows no signs of damage, and that no accessories are missing. Tell the Bluewater dealer about missing parts, damage and other problems. Tell the transport company immediately if Spirit is damaged during transport.

Figure 9. Unpack Spirit and remove the plugs

Position Spirit

Put Spirit in a vertical position on a horizontal surface below the kitchen sink. Make sure that the surface can support Spirit

Position Spirit near the cold water supply, the drain and an earthed electrical supply.

- Make sure that it is easy to see the control panel.
- Make sure that the front cover can be opened to get access to the prefilter.
- Hose and cables can go in all directions from the connection point. Make sure that nothing can crush them or cause damage to them.

Figure 10. Position Spirit under the kitchen sink

| Pos | Description | Pos | Description |
|-----|-----------------|-----|-----------------|
| A | 460 mm (18") | C | 482 mm (19") |
| B | 190 mm (7 1/2") | D | min. 20 mm (1") |

Install clean water faucet

Figure 11. Install clean water faucet

| Measurement | Quarterturn | Electrical |
|-------------|-----------------------------------------------|----------------|
| A | Measure the clean water faucet for measure A. | |
| B | 35 mm (1 1/4") | 40 mm (1 1/2") |
| C | 13 mm (1/2") | 20 mm (3/4") |

Install feed water connection

Only connect the water purifier to the cold water supply. The water must be of sufficient quality and fulfil the requirements on feed water

The water purifier is connected to cold water via the feed water hose. See "Requirements on feed water to water purifier" on page 22.

Figure 12. Install feed water connection

Install drain water connection

Install the drain water hose with an air gap.

The flushed water goes through the drain water hose to the drain water outlet. This hose can be a maximum of 4 m long.

Figure 13. Install drain water connection

Connect the water purifier

Do not connect the clean water hose to equipment before Spirit has been flushed.

Figure 14. Connect the water purifier

After installation

When Spirit is installed, and after each maintenance, the following procedures must be performed before operation.

Flush Spirit

Do not drink the water when the water purifier flushes. It is not safe to use.

The water purifier should always be flushed:

- when it is new and has not been used
- when it is installed again after storage/freeze protection
- when it has been cleaned
- when the membrane has been replaced.

Open the clean water valve immediately when the service button is released. If not, Spirit can be damaged.

Figure 15. Flush Spirit

Do a check for leaks

See "Do a check for leaks" on page 14.

MAINTENANCE

After each maintenance, all procedures in chapter “After installation” on page 12, must be performed before operation.

Regular maintenance is important for correct function and long term operation. Only educated and approved personnel can do the maintenance.

The water quality controls the maintenance frequency. If the feed water is of low quality, do maintenance more often.

Each month

Do a check for leaks

The hose connections must be tight!

Figure 16. Check for leaks

Repair leaks

Figure 17. Repair leaks

Wipe off condensation from base plate

Figure 18. Wipe off condensation from base plate

Each 4-6 months

Descal

The descaling product is harmful. Keep it where children cannot get it. Clean your hands when you have used it. Always flush Spirit after descaling. See “Flush Spirit” on page 12.

Frequency depending on water quality and usage!
To extend the water purifier lifetime: Descale Spirit with 6 month intervals or when the flow is decreased.

If Spirit has been descaled and the filters have been replaced, but the water flow cannot be restored, contact your Bluewater dealer.

The descale takes approximately 10 hours. Do not use the water purifier during this time. Order the descaling product from Bluewater

Figure 19. Descale

Replace prefilter

Replace the filters after what comes first of 4-6 months or 18 925 l (5 000 gal) of purified water.

If the filter is replaced before the FILTER light shows that it is necessary, reset Spirit as given in step 14. The FILTER light will go on and then go out.

Figure 20. Replace prefilter

Each year

Test the water

An approved lab must do a test of the water that is cleaned by Spirit at least one time every year, if the feed water has been classed as unfit.

Other

Clean the grid filter

The grid filter in the feed water connection catches larger particles. If the flow is decreased or if Spirit makes a noise, the grid filter can be blocked.

Figure 21. Clean the grid filter

Use disinfectant to clean the system

Disinfectant is harmful! Always flush the water purifier after disinfectant is used. See "Flush Spirit" on page 12.

Figure 22. Use disinfectant to clean the system

Put into storage

Preserving agent is harmful! Keep it where children cannot get it. Clean your hands when you have used it. Always flush the water purifier after storage. See “Flush Spirit” on page 12.

Put the water purifier into storage if it will not be used for 4 months or more, or if it is to be disconnected from the water and electricity for >5 days.

Figure 23. Put into storage

Reinstall after storage

Preserving agent is harmful! Keep it where children cannot get it. Clean your hands when you have used it. Always flush the water purifier after storage. See "Flush Spirit" on page 12.

Figure 24. Reinstall after storage

| Chlorine Cl ₂ [mg/l (ppm)] | < 1.0 (< 1.0) | < 1.0 (< 1.0) |

Product performance

The WQA Gold Seal proves that the Bluewater water purifier has been independently tested and certified against NSF/ANSI 58 and CSA Standard B483.1. WQA certifies product performance, and reviews the manufacturing facility and procedures to assure product consistency and integrity.

The Bluewater Spirit water purifier has been tested according to NSF/ANSI 58 for reduction of TDS (total dissolved solids).

The concentration of TDS in water entering the system was reduced to a concentration less than or equal to the permissible limit for the water leaving the system, as specified in NSF/ANSI 58.

See performance data sheet on www.bluewatergroup.com for more details.

TROUBLESHOOTING

| Symptom | Cause | Solution |
|--------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 The ON light is not on. | The water purifier is not connected to power. | Connect the water purifier to power. |
| | Spirit 300: The faucet cable is not connected. | Spirit 300: Make sure that the faucet cable and connector are connected. |
| 2 The FILTER light flashes, and the yellow light on the faucet flashes. | The filter must be replaced. | See "Descale" on page 15. |
| 3 The FILTER light is on, and the yellow light on the faucet is on. | The water purifier has stopped. The filter must be replaced. | See "Descale" on page 15. |
| 4 The SERVICE light flashes, and the yellow light on the faucet flashes. | The water quality has decreased, but is safe to drink. The water purifier will stop soon, see 5. | Contact your Bluewater dealer. to replace the membrane. |
| 5 The SERVICE light is on, and the yellow light on the faucet is on. | The water purifier has stopped. A filter replacement has caused air to come into the system. | Disconnect the water purifier from power. Reconnect it. Let the water purifier do the automatic flush. |
| | The water purifier has stopped. The clean water quality has become too low. | Contact your Bluewater dealer. to replace the membrane. |
| 6 The SERVICE light is on, and the yellow and the green lights on the faucet are on. | The water quality meter does not function. | Contact your Bluewater dealer. |
| | The inlet pressure is lower than 1.5 bar during operation. | Contact your Bluewater dealer. |
| | The grid filter is blocked. | See "Clean the grid filter" on page 18. |
| The water purifier does not start. | The filter is blocked. | See "Descale" on page 15. |
| | The water purifier flushes water. | Wait for 5 minutes. |
| | The overflow protection system is activated. | Disconnect the water purifier from power, and clean the base plate. If the overflow protection is activated again, contact your Bluewater dealer. |
| Spirit 300: The faucet light is not on. | Spirit 300: The faucet cable is not connected. | Spirit 300: Make sure that the faucet cable and connector are connected. |
| | There is a problem with the electronic faucet. | Contact your Bluewater dealer |
| The flow rate from the clean water faucet is low. | The faucet cable is not connected. | Make sure that the faucet cable and connector are connected. |
| | The water purifier needs to be descaled. | See "Descale" on page 15 |
| Water does not flow from the clean water faucet. | The clean water hose is tensioned or jammed. | Make sure that the clean water hose can move freely. |
| | The feed water shut-off valve is closed. | Open the feed water shut-off valve. |
| The water smells bad. | Microbial growth in the water because the water purifier has not been used for a week or longer. | See "Use disinfectant to clean the system" on page 19. |

Bluewater is a world leading water purification company. Headquartered in Stockholm, Sweden, the company helps people and businesses globally enjoy the health and wellbeing benefits of cleaner, healthier tap water. Bluewater innovates, makes and sells compact water purifiers that harness the company's patented reverse osmosis technology to remove virtually all pollutants from tap water, including lead, bacteria, pesticides, medical residues, chlorine and lime-scale.
